

WEB TRAINING

HOT WORK

Hot Work is a collective name for work that causes heating or sparking and which may cause fire. In order to perform Hot Work a valid certificate is required. All major insurance companies in Sweden require that hot work be carried out by certified employees. The requirements are governed by the insurance companies insurance terms.

Target group

Employees and contractors performing HotWork. Workers, entrepreneurs and business executives who are the clients of hot work, thus have formal fire protection responsibilities.

Objective

After completion of the training, the participant must be aware of the risks and preventive measures in case of flammable hot work, to minimize the risk of fire or other damage. After completion of the course, participants must be able to give permission for hot work and to be a firefighter and have the knowledge to be able to perform flammable hot work properly.
